### Event 2. Presentation with Steve Lane

A vibrant, engaging presentation by Steve Lane.

**"What we think we want and what we really want!" A discussion on what makes us happy.**

We all strive to be happy even if we don't choose to admit it. Bookshops today are littered with best-selling titles recommending "The 5 ways", "The 10 steps.." "The six secrets..." to happiness. In our lives, we strive for success, advancement, reward and wealth. But do these make us happy? Do they increase our sense of well-being? Indeed, what is happiness? Do we know what well-being is? There is a lot of scientific research focused on these questions at the moment. And the research is coming up with surprisingly simple answers to the question "What makes us happy?"
